

Get the job done right without breaking the bank

TCC Crimp and Strip Tools

Quality tools that are designed to make crimping easier:

- **Exceptional Durability and Construction:** our tools are made to the same exacting standards as our connectors. Only high grade, hardened, industrial steel is used in their construction. They are built from the ground up to be tough enough to withstand the harshness of day in, day out work and provide you with many years of exceptional service.
- **Closing Ratchetting Action:** the tool keeps the pressure on the crimp, allowing for a tighter crimp with less effort.
- **Replaceable Dies:** allows you to keep making tight, sharp, hexed crimps without needing to replace the entire tool.
- **Adjustable Pressure:** adjust your tool to make the best possible crimp for your cable/connector combination.
- **Wide Mouth Opening:** enough room to crimp even large sized connectors and cables easily.
- **Ergonomic Insulated Plastic Grips:** keep your hands comfortable from the start of the job through to the end
